

What is the Maker Faire Long Island

Our Faire is part of the larger Maker Faire brand associated with the Faires in New York City, The Bay Area, Berlin, Barcelona and other cities throughout the world that celebrate creativity and innovation in the areas of Science, Technology, Engineering, Art and Math.

Explorium Children's Museum of Science & Engineering

Who attends?

Last year, 90+ Makers and 2000+ participants of all ages experienced innovative robotics, kinetic and interactive art, and physics. Visitors explored the ocean through virtual reality and many more cutting edge creative experiences. Hands-on exhibits and performances at the Long Island Explorium, Village Center, and Harborfront Park delivered a momentous maker day.

Port Jefferson's Long Island Explorium is thrilled to present our 5th annual maker celebration, The Long Island Maker Faire®, on Saturday, June 11th, 2022

Why Support the Long Island Maker Faire? You CAN make a difference while building your brand.

- 1. Help provide cutting edge, inquiry based learning experiences for P-12 students, state-of-the-art professional development for P-12 teachers, and inventive STEAM challenges for family groups.
- Position yourself as a leading advocate for the advancement of STEAM concepts that translate into skills that address social, economic and environmental issues.
- 3. Advance the Maker Movement which is revolutionizing manufacturing, with huge implications for startups and jobs, and hence helping to fuel economic development.

Long Island Explorium

PO Box 465, Port Jefferson, NY 11777

I am interested in participating as a vendor, please send me your Vendor Information Packet.

Other

I am interested in sponsoring the Faire in another capacity. Please contact me regarding other opportunities.

Maker

I am interested in participating in the event as a Maker, please send me your Maker Information Packet.

The Long Island Explorium is a 501(c)3 not-for-profit and is chartered with the New York State Department of Education. Our vision is to be a leader in STEM discovery, learning and innovation that will shape the intellect, social values and principles of future generations Our curriculum, exhibits and educational approach are unique by design, developed to spark inventive solutions, build confidence by embracing the "fail forward" concept and foster teamwork. We are recognized as Long Island's Family Maker Space, a place for families to play, create, build and grow together. We continue to expand our programming to include professional teacher development and training to meet the goals of the Next Generation Science Standards in New York State.

Featured Makers

Support Innovative and Inspiring Makers - Jorvon Moss - OddJayy

OVERVIEW & WHY WE WANT THEM AT THE FAIRE

A self-taught Maker, of companion Robots hailing from Compton, California. Jorvon, known as "Odd Jayy" in maker circles would bring a wonderful panel discussion on making robots wearable, huggable, and even helpful. Learn how to design and build your own, and enjoy this inspiring and entertaining panel! Featured in Make Magazine, Hackster.io, Rasberrypi.com, hackaday.com, Tinkercad plus more.

FROM THE MAKER

It all started with a BIG BANG!! I am a self-taught Maker, though I prefer the term tinker. I went to art school and during so I realized I did not want to just draw I wanted to create. So as well as caring about my art studies, I began reading every book on science and engineering I could get my hands on, I taught myself to CAD, and after a ton of failures, I began to understand how things work. I always wanted a robot best friend so I began focusing on robotics, soon I learned a process that could make quick robotics based on small art and design.

MYTHBUSTERS, JR PANEL

Support Women and Girls in STEM - Allie Weber - MythBusters Jr

Young maker, builder, and award-winning patented inventor Allie Weber is coming to Maker Faire Long Island! Allie Weber is a 17-year-old Sioux Falls, South Dakota teen and a MythBusters on the Discovery Science Channel show, MythBusters Jr. hosted by Adam Savage. Allie was cast on the show because she is known as a maker, inventor, and builder. Allie produces and hosts her own YouTube channel "Tech-nic-Allie Speaking" where she builds amazing things, shows her inventions, and gives reviews of tech-toys. Her YouTube show seeks to entertain, help kids get into STEAM, and to show how to build your own dreams.

FROM THE MAKERS

Allie has a need for making and creating using all kinds of tools and materials. Her awards and recognitions include Teen Vogue 21 under 21 girls who are changing the world, first place innovator in the Global Spark Lab invent it challenge sponsored by Smithsonian, first place in the Global Paradigm Challenge, and a Top Ten Young Scientist in the country according to 3M in 2017. She also helped to design a prop featured in Ghostbusters: Afterlife, and constructed her own portable life-size TARDIS replica of her own design. Allie uses her YouTube channel Technic-Allie Speaking and her social media to inspire others no matter their age to build, make, and create and to show people that "Kids are not the future, we are here now. We are not going to change the world someday, we already are."

Support Women and Girls in STEM - Rachel Pizzolato - from MythBuster Jr

OVERVIEW & WHY WE WANT THEM AT THE FAIRE

Rachel Pizzolato is a multi-talented, award-winning scientist and Patent-Pending inventor, published writer and poet, fashion and runway model, National Champion Trampolinist, as well as, an actor starring in Discovery Science Channel's - MythBusters Jr. Her inventions have garnered success at the Greater New Orleans Science and Engineering Fair where she won the Grand Award in 2016, 2017, 2018. She has competed in many National and International Competitions such as Broadcom MASTERS (2016, 2017, and 2018) Coolest Projects (2019 & 2020), and ISEF (2019 & 2020). In 2016, she was awarded, from MIT, a minor planet named after her called (Pizzolato 33187). Recently, she also won Akron's Global Polymer Academy's National Award in Science and Engineering. Also, her writing has garnered awards from NASA and in 2018, she won the AIAA National NASA essay competition for her article entitled, "Astronauts - The Right Stuff Indeed!"

FROM THE MAKER

One of her favorite hobbies is talking with kids and encouraging them to dream big and follow those dreams by participating in the activities that they enjoy and are passionate about!!! She feels that it is extremely important to cultivate young minds and show them that there are people out there that are behind them and want to see them succeed! She wants to show them that if they put their minds to something, there is nothing that can't be accomplished. Rachel wants to instill in them to ask questions and be inquisitive in all areas of their lives. She feels that it is important to encourage kids to explore their interests with a passion! Most of all, she wants to encourage everyone to, "Dream Big!"

Support Young Innovative and Inspiring Makers- Elijah Horland – from MythBuster Jr

OVERVIEW & WHY WE WANT THEM AT THE FAIRE

Elijah is a local maker with a big presence in the New York Maker scene. Elijah started as a "Maker" in 2015 as a way to learn all the skills he needed to launch a high-altitude balloon into "near-earth orbit." Along the way he joined the Maker movement, made friends, took a job on TV's "MythBusters Jr." and became a regular at Maker Faire. Now 16, He continues to build, make, explore, teach, share, and play. This young Maker is an inspiration and having him be a featured speaker would be a big draw.

Mythbuster Jr Panel: When Rachel brings the Dazzle, Allie brings the inspiration, Elijah always follows along with the "creative" mischief. We're never sure if the quotes go over creative or "mischief."

FROM THE MAKER

Hi. I'm Elijah. I'm a Maker and I make fun, loud, obnoxious videos. Becoming a MythBusters was only one step along the way on my journey to finish my very first "maker" project.

Support Young Innovative and Inspiring Makers- Valerie Castillo – from MythBuster Jr

OVERVIEW & WHY WE WANT THEM AT THE FAIRE

If your principal singles you out for something at school, you might be a little nervous. But for Valerie Castillo, then 15, it was good news: he had nominated her to audition for the cast of "MythBusters, Jr." As captain of her high school's robotics team — and its only female member — Valerie was a natural fit for the show. "I'm extremely headstrong. I don't let anyone tell me that I can't do something because of my background or gender," she says. She hopes being on "MythBusters, Jr." will inspire more girls to pursue traditionally male-dominated fields.

FROM THE MAKER

Junior MythBusters, former VEX Robotics World Championship participant, builder, roboticist, and engineer experienced in CAD drawing and 3D printing. I'm also a first-year student at California State Polytechnic University, Pomona, majoring in mechanical engineering.

Support Innovative and Inspiring Makers VIRTUALLY - The CrafsMan

OVERVIEW & WHY WE WANT THEM AT THE FAIRE

Known elusively only as The CrafsMan, his YouTube channel "TheCrafsman SteadyCraftin" is enjoyed by countless folks not only interested in his content material but also his soothing demeanor and allaround genuine "awesome-nicity". He's often been described as "The Bob Ross of Crafting". With a following of 496K followers and counting, his techniques range from low-tech all the way up to medium-tech.

FROM THE MAKERS

The Crafsman is attending Maker Faire Long Island this year using a telepresence robot built by some of his fellow Makers. The Crafsman will be participating in live sessions throughout the day and folks will be able to interact with him in real-time! This will be a first of its kind virtual experience for the faire.

Support Innovative and Inspiring Makers - Mandalorian Mercs

OVERVIEW & WHY WE WANT THEM AT THE FAIRE

You cannot go anywhere this year without hearing about Baby Yoda and Star Wars. A new generation of fans are flocking to the genre and this group joins a passion for the Mandolorian universe with educating people on fabricating their own costume while campaigning for a good cause (raising money for children's charity)

FROM THE MAKERS

The Mandalorian Mercs Costume Club is a collective of builders who specialize in the creation of Mandalorian armor. Along with building, we use our costumes to raise money for different charities around the world.

Support Innovative and Inspiring Makers - 501st Legion Empire City Garrison

OVERVIEW & WHY WE WANT THEM AT THE FAIRE

The force is strong this year and pulls people from all walks of life together. The 501st Legion is an all-volunteer worldwide organization formed for the express purpose of bringing together costume enthusiasts under a collective identity within which to operate. Their numerous charity events and exhibitions always draw a crowd. They are the "bad characters" that bring smiles and do good.

FROM THE MAKERS

The Legion seeks to promote interest in Star Wars as well as contributions to the local community through costumed charity and volunteer work. We are officially recognized by Disney / Lucas Film as their preferred costuming group
